## **INLAND EMPIRE MANUFACTURERS GAIN GREATER ACCESS TO PACKSIZE Z-FOLD AS SHIFT TOWARD LEAN PACKAGING SYSTEMS BUILDS**

*Packsize expands to Southern California its proprietary corrugated production in response to growing consumer goods supplier and retailer markets for On Demand Packaging®.*

**SALT LAKE CITY — March 5, 2014** — [Packsize International](#) today announced the expansion of its [z-Fold™](#) corrugated production in Southern California, which will provide greater access and improved delivery times to the company's Inland Empire customers. A proprietary, 97 percent recyclable corrugated material designed specifically for [On Demand Packaging®](#), z-Fold™ gives Packsize customers the ability to control time and costs associated with their carton packaging.

Driven by several factors, including the need to balance operational quality with innovation, a continued push toward lean manufacturing, and the connected consumers' increased expectations for speedier supplier response, Packsize continues to receive strong adoption of On Demand Packaging® across [U.S. manufacturing sectors](#), including Southern California, which accounts for more than half of all manufacturing establishments in that state.

The expanded production for z-Fold™ from a paper mill outside of Fresno will increase Packsize delivery times by at least 95 percent in Southern California. "While reducing the delivery distance and carbon footprint for our customers is important in meeting demand requirements for this region, these customers will continue to derive the best that On Demand Packaging® offers, including less waste, lower shipping costs, decreased damage rates, and increased customer satisfaction," said CEO Hanko Kiessner.

Available to customers of its [automated packaging machines](#), Packsize z-Fold™ can be creased, cut, and scored into an infinite number of box styles and sizes. Packsize z-Fold™ is free from quality defects and provides the customer with a box yield that meets their packaging requirements on any given day.

[Corrugated packaging](#) continues to have broad appeal among packaging buyers and end-users alike and remains today an environmentally preferable method for product delivery. This type of packaging is versatile, cost-effective, allows for customization, and lends itself to product protection during shipping.

### **About Packsize International LLC**

Founded in 2002 and headquartered in Salt Lake City, [Packsize International LLC](#) is the world's leading provider of lean packaging systems for businesses with complex corrugated packaging needs. Recognized with several premier industry awards, continuously ranked by Inc. 5000 and Deloitte's Technology Fast 500™, and listed by *Forbes* as one of America's Most Promising Companies, Packsize's revolutionary On Demand Packaging® system gives companies the ability to produce the right-sized box for every product when they need it.
